PROFESSIONAL SUMMARY

Dedicated **DevOps Engineer** with a strong **Full-Stack Software Development foundation**, specializing in the design, configuration, and automation of resilient **CI/CD pipelines**, containerized environments, and hybrid cloud/on-premise infrastructures. Practical expertise spanning **Docker multi-stage containerization**, **Kubernetes & HashiCorp Nomad orchestration**, automated pipeline tooling (**Jenkins, GitHub Actions**), container fleet management via **Portainer**, and Linux server administration. Currently playing a key role in the new **Core Banking System (Temenos CBS)** project at BNH, implementing automated CI/CD workflows, staging environments, and high-availability Data Center deployments under rigorous banking standards. Combines a deep architectural understanding of codebases (Next.js, Node.js, C# .NET, SQL Server) with infrastructure automation to deliver zero-downtime releases and resilient systems.

TECHNICAL EXPERTISE

CI/CD & AUTOMATION PIPELINES

Jenkins (Declarative & Scripted Pipelines), **GitHub Actions (Multi-Stage Workflows)**, Automated Testing & Linting Gates, Build Optimization, Artifact Packaging, Release Management.

CONTAINERIZATION & ORCHESTRATION

Docker, Dockerfile Multi-Stage Optimization, Docker Compose, **Portainer (Stack & Lifecycle Management)**, **Kubernetes (Deployments, Services, ConfigMaps, Ingress)**, **HashiCorp Nomad**.

INFRASTRUCTURE, CLOUD & DATA CENTER

Linux Server Admin (Ubuntu, Debian, CentOS), Banking Data Center on-premise environments, **Vercel Edge Global CDN**, **Microsoft Azure**, Nginx (Reverse Proxy, Load Balancing, SSL/TLS 1.3), Bash scripting.

FULL-STACK DEVELOPER FOUNDATION

Node.js, TypeScript, Next.js 15, C# ASP.NET Core (.NET 8), RESTful APIs, **SQL Server (T-SQL, Query Plans)**, PostgreSQL, Redis, Git branching (Trunk-based, GitFlow), OWASP Top 10.

PROFESSIONAL EXPERIENCE

DevOps & Core Banking Systems Engineer

Sept 2025 – Present

BNH – Banque Nationale d'Habitat

Algiers, Algeria

- **Core Banking CI/CD Pipeline Implementation (Temenos CBS):** Actively driving the design, configuration, and optimization of automated **CI/CD pipelines (Jenkins, GitHub Actions)** for the new Core Banking System (Temenos); establishing automated quality gates (unit tests, security linting, build packaging) and seamless deployment promotion between development, testing, and pre-production banking environments.
- **Containerization & Portainer Management for Banking Satellites:** Architected Docker container packaging for internal banking applications and peripheral services connected to legacy CBS (SYBU), including **Monetics (Card & ATM Switch interfaces)**, **Centrale des Risques (CDR risk monitoring)**, and **Centrale des Impayés**; deployed **Portainer** for unified container lifecycle monitoring, health checks, and rapid service rollback.
- **Banking Data Center Infrastructure & Environment Parity:** Collaborated with infrastructure and network operations teams in provisioning and configuring high-availability on-premise environments; set up hardened **Nginx reverse proxies** with SSL/TLS termination, automated header hardening, and internal network segmentation protecting internal service tiers.
- **Release Engineering & Environment Troubleshooting:** Managed release cycles, configuration baselines, and cross-environment synchronization (Dev / Staging / Prod); resolved critical environment discrepancies, network socket issues, and permission boundaries under strict banking security policies.
- **Full-Stack Collaboration & SQL Server Reliability:** Leveraged software engineering expertise (ASP.NET Core C# .NET 8, Node.js) and in-depth **SQL Server (T-SQL) execution plan diagnostics** to assist application teams in resolving deadlocks, optimizing heavy transactional batch queries, and guaranteeing ACID consistency on financial databases.

PROFESSIONAL EXPERIENCE (CONTINUED)

DevOps & Cloud Infrastructure Engineer (Freelance / Independent)
2024 – Present
SaaS, Industrial & Commercial Platforms
Algiers / Remote

- **End-to-End Infrastructure Automation:** Engineered and automated deployment lifecycles for multiple web applications and SaaS platforms, taking complete ownership of Dockerization, CI/CD pipeline automation, reverse proxy configuration, DNS management, and monitoring.
- **Full-Stack Systems Synergy:** Bridged the gap between application development and operations by developing both application code (TypeScript, Next.js, Node.js, databases) and automated infrastructure stacks, accelerating deployment velocity from days to minutes.

DEVOPS & INFRASTRUCTURE PROJECTS

Aura Bags — Containerized B2B Platform LIVE APP

URL: https://bags-factory.vercel.app

Docker · Docker Compose · Portainer · GitHub Actions · Nginx · Linux

Containerized a multi-tier industrial manufacturing platform (Next.js frontend, Node.js/Express API, PostgreSQL database). Authored multi-stage Dockerfiles utilizing Alpine base images, slashing production image sizes by 60%. Configured GitHub Actions CI/CD pipelines for automated testing, container build, and deployment. Managed container health, persistent volumes, and Let's Encrypt SSL via Portainer and Nginx.

PC Labs — Edge Infrastructure & CI/CD LIVE APP

URL: https://pc-labs-app.vercel.app

Vercel Edge CDN · GitHub Actions · CI Quality Gates · Telemetry

Architected edge delivery pipeline for a high-performance hardware compatibility engine. Integrated automated CI build verification and bundle size gates on GitHub Actions with dynamic preview environments per pull request. Configured edge caching and client-side performance telemetry, ensuring zero-latency constraint solving and sub-15ms UI responsiveness.

NutriSaaS — Multi-Service Orchestration LIVE APP

URL: https://mahdi-gym.vercel.app

Docker · Docker Compose · Microservices · Python · NestJS · Next.js

Designed container topology isolating the web application, NestJS backend API, and Python AI vision/vector compute service across dedicated Docker bridge networks. Implemented persistent volume policies for vector index state, isolated container secrets, and health-check endpoints for automated recovery in the event of service degradation.

Zain Agency — Production Infrastructure LIVE APP

URL: https://zain-agency.vercel.app/fr

Next.js 15 · GitHub Actions · SSL/TLS 1.3 · DNS · Nginx

Configured production cloud delivery for a high-traffic multilingual travel and booking platform. Implemented automated zero-downtime release pipelines with GitHub Actions, DNS routing, automated SSL/TLS certificate renewal, and security header hardening (HSTS, CSP, X-Frame-Options) to safeguard transactional client data.

EDUCATION & PROFESSIONAL FORMATIONS

Formation Ingénieur DevOps
Institut de Formation Professionnelle
2025 | Algiers, Algeria

Comprehensive hands-on training in Docker containerization, Kubernetes cluster orchestration, HashiCorp Nomad scheduling, Jenkins CI/CD pipeline automation, and Linux server administration.

Formation CBS & Data Center Deployment
Banking Systems Infrastructure Division
2025 – 2026 | Algiers, Algeria

Practical training on installation, network configuration, and deployment of Core Banking System (CBS) environments within on-premise Banking Data Centers.

Licence en Informatique (Bachelor's Degree)
Université Ferhat Abbas (UFAS 1)
2022 – 2025 | Sétif, Algeria

Core curriculum in Systems Architecture, Operating Systems & Kernels, Networking Protocols (TCP/IP, HTTP/S, DNS), Databases, and Software Engineering.

Google AI Professional Certificate
Google · Coursera (ID: YS26JC7JM5VP)
2026 | Professional Credential

Machine Learning architectures, generative models, vector embeddings, Prompt Engineering, and automated AI application engineering pipelines.

LANGUAGES

Arabic: Native
French: Fluent / Bilingual (C1)
English: Professional (B2/C1)

CORE DEVOPS CAPABILITIES

Automated CI/CD Pipelines
Docker & Portainer Management
Kubernetes & Nomad
Banking Data Center & Parity
