PROFESSIONAL SUMMARY

Results-driven **Full-Stack Developer** with over 3 years of hands-on experience designing, developing, and scaling high-performance web applications, enterprise satellite systems, and mission-critical financial backends. Strong command of modern frontend ecosystems (**Next.js 15, React 19, TypeScript**) and enterprise backend frameworks (**ASP.NET Core C# .NET 8, Node.js, NestJS**) with deep expertise in **SQL Server (T-SQL) query tuning, indexing, and execution plan optimization**. Solid background in **DevOps automation**, including multi-stage Docker containerization, CI/CD pipeline implementation (Jenkins, GitHub Actions), and high-availability Data Center environments. Currently actively contributing to the new **Core Banking System (Temenos)** transition and CI/CD workflows at BNH.

TECHNICAL EXPERTISE

FRONTEND & UI ENGINEERING

Next.js 15 (App Router, Server Components), React 19, TypeScript, JavaScript (ES6+), Tailwind CSS, Three.js / WebGL, Framer Motion, Responsive Design, State Machines.

BACKEND & SYSTEMS ARCHITECTURE

ASP.NET Core (.NET 8 C#), Node.js, NestJS, Express.js, RESTful APIs, GraphQL, Microservices, Domain-Driven Design (DDD), Clean Architecture, WebSockets.

DATABASES & PERFORMANCE TUNING

SQL Server (T-SQL), Stored Procedures, Advanced Indexing (Clustered / Non-Clustered), Execution Plans, Deadlock Elimination, PostgreSQL, Redis (Caching & Pub/Sub).

DEVOPS, CI/CD & INFRASTRUCTURE

Docker, Docker Compose, CI/CD (GitHub Actions, Jenkins), Portainer, Kubernetes & Nomad basics, Linux Admin (Ubuntu/Debian), Nginx, Vercel Edge, Azure, Data Center.

PROFESSIONAL EXPERIENCE

Full-Stack & Core Banking Software Engineer

Sept 2025 – Present
Algiers, Algeria

BNH – Banque Nationale d'Habitat

- **Core Banking Modernization & CI/CD Pipelines:** Actively contributing to the architectural transition towards the new Core Banking System (**Temenos CBS**); analyzing technical specifications, mapping data flows, and collaborating with infrastructure teams to establish and improve automated **CI/CD pipelines (Jenkins, GitHub workflows)** for automated build testing, packaging, and zero-downtime deployment across banking environments.
- **Legacy CBS (SYBU) Satellites Full-Stack Integration:** Architected, developed, and interconnected full-stack satellite applications exchanging real-time and batch financial data with the legacy Core Banking system (SYBU):
  - **Monetics Subsystem:** Built secure backend processing modules for electronic card transactions, ATM switch communications, and clearing file reconciliations.
  - **Centrale des Risques (CDR):** Automated institutional credit risk data aggregation, calculation algorithms, and regulatory reporting exports to central banking authorities.
  - **Centrale des Impayés:** Engineered an automated platform for tracking unpaid debts, delinquent checks, and automated customer credit alert notifications.
- **High-Performance SQL Server (T-SQL) & Execution Optimization:** Authored high-throughput stored procedures, ACID transactions, and user-defined functions; engineered advanced indexing strategies (composite, non-clustered, covering indexes) reducing query latency by up to 60%; diagnosed bottlenecks via Execution Plan analysis and eliminated costly lock contentions on high-volume financial ledgers.
- **Secure REST APIs (.NET 8 & Node.js):** Developed modular backend services in **ASP.NET Core (C# .NET 8)** and **Node.js** featuring JWT/RBAC security, OWASP-compliant request validation, and high-performance database connectivity.
- **DevOps & Data Center Collaboration:** Containerized internal banking tools using Docker for reliable staging environments and coordinated with operations teams for secure deployments in the on-premise banking Data Center.

PROFESSIONAL EXPERIENCE (CONTINUED)

Lead Full-Stack & Solutions Engineer (Freelance / Independent)
2024 – Present
Autonomous Projects & Enterprise Consulting
Algiers / Remote

- **End-to-End Application Delivery:** Architected, implemented, and deployed full-lifecycle web platforms, SaaS products, and high-throughput systems for commercial clients, overseeing frontend UI, backend APIs, database design, and cloud deployments.
- **DevOps Integration & Cloud Automation:** Configured automated CI/CD deployment pipelines using GitHub Actions, containerized microservices using Docker, and managed edge deployment environments with 99.9% uptime.

KEY ENGINEERING PROJECTS

PC Labs — Hardware Simulator LIVE APP
URL: https://pc-labs-app.vercel.app
Next.js 15 · TypeScript · Tailwind CSS · React 19 · Vercel Edge
Interactive web application for simulating computer hardware compatibility and custom PC configurations. Engineered a client-side zero-latency constraint engine checking CPU sockets, RAM clearances, PCIe bandwidth, and dynamic TDP thermal power consumption with real-time bottleneck telemetry. Deployed on Vercel Global Edge CDN.

Aura Bags — Industrial B2B Portal LIVE APP
URL: https://bags-factory.vercel.app
Next.js 15 · Node.js · Express · PostgreSQL · Tailwind · Docker
Full-scale B2B manufacturing and packaging portal. Built a dynamic material specification builder and grammage (GSM) calculator computing tensile resistance, manufacturing costs, and real-time custom quotes. Implemented role-based admin workflows, multi-stage production tracking, and Dockerized deployment.

NutriSaaS — AI Vision Health Platform LIVE APP
URL: https://mahdi-gym.vercel.app
Next.js · React · Python · NestJS · Computer Vision API · Docker
AI-driven health and fitness platform featuring real-time 4K computer vision food scanning with instant macronutrient breakdown (calories, protein, carbs, fats). Engineered an adaptive metabolic engine adjusting targets based on energy expenditure, and integrated an Algerian Darija conversational AI coach.

Zain Agency — Travel Booking Platform LIVE APP
URL: https://zain-agency.vercel.app/fr
Next.js 15 · TypeScript · CSS Modules · i18n Routing · QR Tracking
Comprehensive travel agency and booking platform with full trilingual internationalization (AR/FR/EN). Built package reservation systems for Hajj & Omra, airline ticketing, visa workflows, client verification portal with automated QR code pass generation, and an administrative management dashboard.

EDUCATION & PROFESSIONAL FORMATIONS

Licence en Informatique (Bachelor's Degree)
Université Ferhat Abbas (UFAS 1)
2022 – 2025 | Sétif, Algeria
Core curriculum in Software Engineering, Algorithms, Relational Databases, Operating Systems, Networks & Systems Architecture.

Formation CBS & Data Center Deployment
Banking Systems Infrastructure Division
2025 – 2026 | Algiers, Algeria
Specialized practical training on installation, configuration, and deployment of Core Banking System (CBS) environments in Banking Data Centers.

Formation Ingénieur DevOps
Institut de Formation Professionnelle
2025 | Algiers, Algeria
Intensive professional training in Docker containerization, Kubernetes orchestration, Jenkins automated CI/CD pipelines, and Linux server administration.

Google AI Professional Certificate
Google · Coursera (ID: YS26JC7JM5VP)
2026 | Professional Credential
Applied Generative AI architectures, vector embeddings, Prompt Engineering, RAG retrieval pipelines, and AI systems development.

LANGUAGES

Arabic: Native
French: Fluent / Bilingual (C1)
English: Professional (B2/C1)

KEY COMPETENCIES

Core Banking (Temenos / SYBU)
Full SDLC & Architecture
CI/CD & DevOps Automation
SQL Optimization & Indexing
